THE RED HAT AUTOMATED MIGRATION ASSESSMENT FOR SAP LANDSCAPES

On the Road to SAP S/4HANA

West Trax (WT) is the independent authority for FACTS about a customer's SAP® systems landscape, uniquely saving significant time and money vs. traditional manual workshops. C Suite executives love simple and accuracy!

Red Hat bundles West Trax assessments with their specific operating analysis, to provide the total migration picture. Red Hat is Linux of choice for most Fortune-class enterprises and certified for SAP HANA.

Numbers, and data, don't lie in this age of analytics.

FACTS, from 1,640 code migration assessments, provide the unobstructed view of today's SAP systems maturity landscape. What will *you* migrate, leave behind, and why?

Do you know *all* the FACTS that guarantee that your SAP systems are future-proof e.g. the new SAP technology can be used without problems, a seamless transition to digital migration is possible?

THE FACTS

Source: 1,640 West Trax assessments across 15 industries

Cost-effective West Trax automated migration assessment methodology can typically save an SAP customer up to 70% of fees spent in months of Face-to-Face workshops.

Results are produced in 5 – 15 days, with the added value of Red Hat analysis for extended benefits you cannot get anywhere else.

Benchmarks data powers West Trax analysis software. Since 2002, this depth of comprehensive set of migration assessments benchmarks is assembled in this trusted resource!

Two Levels of Automated Migration Assessments!

Values to assess on the journey to SAP S/4HANA

Image linked to reference

C Suite ... *executive assessments* to leverage real-time decision values that save money, increase agility, and ensure stability, running on Red Hat Enterprise Linux for digital transformation.

LoB Mgmt. ... *strategic assessments* to optimize performance reliability and data sharing values for apps across a customer's organization, to digitally transform and run on Red Hat.

IT Mgmt. ... *project assessments* for flexibility and agility values that cut costs of big data analysis and reports for critical digital transformation plans with SAP certified Red Hat.

EXECUTIVE: Red Hat Automated Migration Assessment for SAP Landscapes:

Runs 5 days - helps the C Suite know where the organization stands today.

8 KPI benchmarks are analyzed to [increase business value](#) quickly, using this cost-effective assessment across *all* ERP modules in your ERP system. This enables Sr. Executives to rapidly determine their SAP systems maturity landscape. The unique Red Hat West Trax partnership with the BTT In-Memory Apps Institute assures vital transparency for business standards.

Compare this executive advantage with module-by-module ERP assessments that chew up budgets, using Face-to-Face workshops. They drive up costs in man hours ... plus, human errors add to costs.

Board members love the West Trax [lean action](#); this *ensures* veracity, saving money to instead spend on migration implementations for digital transformation benefits ... using *your* System Integrator or Consultant. This is an absolute insurance policy and why SAP endorses these assessments!

BUSINESS PROCESS DEEP DIVE ANALYSIS: With S/4HANA Fit Gap

Runs 10 days - the cost-effective next step IT & LoB can leverage

SAP ERP software is the leading solution to run enterprises and Red Hat is the Fortune-class Linux of choice. The [deep dive methodology](#) probes each of those 8 KPI metrics identified in the executive level assessment.

This finds *all* FACTS without workshops or interviews, without any great effort for you.

Customized [Tools & Services](#) are used for your organization, in your industry. The depth of benchmarks data assures transparency across an SAP customer's landscape. Since 2002, more SAP customers rely on West Trax automated software methods designed to assure that your SAP system is used optimally and the capital invested is effectively used. See typical S/4HANA References in this pdf.

Two Ways to Capitalize

Super Über App: totally disrupts other migration assessments available to SAP customers, in a *12 month subscription for unlimited cloud usage across your entire SAP systems landscape*. This SAP Cloud Platform app is designed for SAP customers to run on their device of choice!

The SAP Cloud Platform subscription includes the new Business Transformation Today (BTT) migration assessments challenges dashboard + your choice of BTT's Value Realization Intelligence for Workforce Engagement (SuccessFactors and HCM) or Finance on S/4HANA.

Standard Über Assessment: if you prefer the traditional approach, you can use the assessment methodology in a total one-time event, where the data is gathered from your location and processed at West Trax. The data collection cycle only takes a few hours.

Either way: customers gain a significant value-added analysis from the Red Hat services team Results2Advice, and BTT In-Memory Apps Institute having rated these assessments with the highest levels of Standards-Certification in the SAP marketplace!

Plan Now, Know the Road Ahead

CIO's talk about getting ahead of the digital transformation curve. Whereas CFO's and CEO's - like the CEO at the Hershey Company who says that these things are happening faster than ever – wonder when a competitor will disrupt their business.

Our simple objective – our goal is to answer your questions, to help each SAP customer gain competitive advantage to realize values of apps across the SAP Digital Business Framework.

Your first step - plan early, starting with SAP HANA, to save your organization a considerable amount of unnecessary effort, and cut costs both in the short and long run.

The cost-effective automated migration assessment - intelligence your organization can leverage today with analysis from Red Hat and West Trax. Packaged with business value realization dashboards at Business Transformation Today, you will be ready for your System Integrator or VAR to *implement* migrations on the journey to S/4HANA!
